We act with you,  
to protect the environment and  
to support people in need.

We are committed in association with Trees and Life to plant one tree for each boat rented whatever the length of stay. This reforestation project is in no way an industrial or mass project, planted trees will concretely improve the life of a population in Senegal. Indeed, these trees will be planted in fields to provide shade and fruit and to enrich the soil, or as hedges to protect crop fields from animals.

For an action in full transparency, you will receive with your booking documents, a certificate with GPS coordinates in order to let you see on the internet where your tree will be planted. Throughout the season, we will keep you informed about the number of trees already planted thanks to you and we will upload photos of the project, actors and people to show you how you improved their life.

But that's not all: because there are no little things to do for the planet, we decided to go further on: a green cleaning set is now available in all boats of the PREMIUM fleet in France. This set consists of biodegradable and environmentally friendly cleaning products. In addition, for the clients who want to support our work, they can purchase this set the day of departure in many departure bases.

Canalboating also means holiday in harmony with nature and respect of the environment, doesn't it?
